## GREEN LAWNS DON'T HAVE TO EQUAL GREEN LAKES

Sure, we all want a great lawn. Doing it the right way means we get great water, too. Excess nutrients, specifically nitrogen and phosphorus, pollute waterways, run off from urban areas, contributing to the most ground water of toxic substances in the U.S.

56%

34.2 lbs.

100 lbs.

ONE TON

### WHY DOES IT MATTER?

More than 100,000 miles of rivers and streams in the U.S. are polluted with nutrients, nitrogen and phosphorus, a pollution that causes algae blooms and dead zones.

Excess nutrients can cause rapid growth of algae, which can be harmful to fish, wildlife, and humans. The algae blooms can also cause a drinking water problem.

### WHAT YOU CAN DO

- Dispose Properly**
  - Don't pour lawn care products down the drain.
  - Use a lawn care product that is labeled for disposal.
  - Use a lawn care product that is labeled for disposal.
- Save It Once**
  - Use a lawn care product that is labeled for disposal.
  - Use a lawn care product that is labeled for disposal.
  - Use a lawn care product that is labeled for disposal.
- Fertilize Efficiently**
  - Use a lawn care product that is labeled for disposal.
  - Use a lawn care product that is labeled for disposal.
  - Use a lawn care product that is labeled for disposal.
- Choose Wisely**
  - Use a lawn care product that is labeled for disposal.
  - Use a lawn care product that is labeled for disposal.
  - Use a lawn care product that is labeled for disposal.
